

Narashino Inageya

Since 1918, we have been delivering to our customers their perfect boots with our highest quality material, traditional style and excellent skills as riding boot maker.

The advantage lies in that the leather riding boot is made especially for you, pair by pair, to fit your feet and to cater to your style, size and feel.

Experience the comfort, of the genuine leather riding boots.

From measurement to delivery a skilled craftsman will first take measurements of your feet and ask for any requests. He will subsequently choose and tailor the material (a pair of boots is made from a whole cow), create the paper and wooden last, and produce the riding boots by hand.

After the delivery of the boots, there is a 3-month period which we provide free adjustment service for our customers. We subsequently take care of your maintenance and adjustment needs as well
